

## Neural Culture Technical Laboratory

### Techniques offered in primary culture cell

- Cerebellar granule neurons
- Pure embryonic cortical neurons
- Pure embryonic hippocampal neurons
- Embryonic cortical mixed culture
- Embryonic hippocampal mixed culture
- Mixed cerebellar cultures of granular neurons and astrocytes
- Mixed glia of cortex, hippocampus, midbrain, cerebellum or whole brain
- Astrocytes of the cortex, hippocampus, midbrain, cerebellum or whole brain
- Extraction of microglia from mixed glia culture
- Obtaining glial cultures enriched in oligodendrocytes
- Obtaining rat midbrain neurospheres and subsequent differentiation
- Organotypic hippocampal culture

The offer can be expanded in response to the specific needs of any research group.

The facilities are accredited by the el Ministerio de Agricultura, Pesca y Alimentación to work with Genetically Modified Organisms within the level of biosafety 2
